WELCOME FROM OUTFRONT CATTLE SERVICE

Dear Friends:

WOW, what a set of cattle, semen, and embryos for the 2023 Sale of Excellence! 100 lots of the most exciting and proven pedigrees in Charolais! We have international influence as we have genetics from Canada, New Zealand, and the U.S. This will be one of the most “Fun Auction” you can attend in 2023! It’s always a great event but this year Stands Alone! We have a pregnant recipient carrying a full sib to the \$245,000 Canadian top lot in 2021 SCX Jehu 233E. Also, a full sister to FTJ Monticello 1806, an embryo in a pregnant recipient just to name a couple of the elite lots!

But as usual, we have some of the tried and proven lots you see every year here from the same consignors that you know and respect their programs. There are so many great lots that there will be something here for everyone and every budget. Some tremendous Pairs that will feature top of the line genetics with those outstanding calves by leading A-I Sires! Also, one super bull prospect, just a calf at side of recipient, but a real potential herd sire by the Jubal bull, one of his very first calves!

Lehmann’s are bringing a daughter of their \$17,500 purchase here in the Sale of Excellence a couple years ago that has become a stalwart producer in the entire industry. And Fink’s that have topped the sale the last two years, are offering the “Pick” of all their fall 2023 heifers. Most are ET calves and by their top donors! And Larson Cattle Co are offering a “Pick” of cows for a guaranteed Flush!

If you knew me, I could talk about every lot, they are that good! But enjoy the catalog and be sure to attend to see what’s going on in the industry and meet up with old and new friends for a fun weekend! We’re proud to have Clint Rush here from AICA to give updates on Friday night with the meal. You won’t want to miss that! Clint is helping to lead this breed into a better future for all! On Saturday we will again have the great Fajitas from Chuy’s, with their special Jalapeño Ranch dressing! After the sale we will again have the “Fun Auction” so bring the whole family there is something for everyone! This is a family event, and everyone is welcome!!!

Sincerely,

Dennis Adams

3A: Twin Bull calf, 33K, born 12/1/22, bw 70, sired by DC/CRJ Tank E108 P. (twin heifer removed). Will be rebred to JMAR Jubal SP01 before the sale. One of the longest bodied cows you will find and ultra-feminine in design. Her dam was bred by Wild Indian Acres and evolves from a Bluegrass daughter. The Jubal calves have been very easy calving with lots of vigor at birth. They also show tremendous docility. This Tank bull calf would be excellent for calving heifers!

A-I bred on 1/6/23 to DC/CRJ Tank E108 P, PE from 2/12/23 to RE Kingman 134 ET. Her dam, 23Z, was the high selling donor cow from Rocking S Sale for Arlitt and Tim Lee. She is also a paternal sib to BHD Zen X270 and her dam traces to "Miss American Beef", the dam of JDJ Smokester J1377 P. Quite a pedigree in this royal lady! The Sugar Daddy bulls were the 2nd high selling sire group at DeBruycker's, averaging \$5800.00 on 15 head in 2023.

A-I bred on 1/6/23 to DC/CRJ Tank E108 P, PE from 2/12/23 to RE Kingman 134 ET. Superbly built heifer, deep ribbed, square hip and lots of thickness to replicate the true design of Sugar Daddy offspring! This is a BEEF cow while retaining plenty of femininity. Her Tank calf will be an awesome addition to any program! Her dam has an enviable CI of 6/17; twins 12/18; 3/20; 3/21; and 2/22 to show the fertility of Charolais!

A-I bred on 1/6/23 to DC/CRJ Tank E108 P, PE from 2/12/23 to RE Kingman 134 ET. The Arlitt's are well known for raising big, stout powerful females that retain good maternal ability. Amazing how much this heifer resembles the other great Arlitt consignments of Maximo's and King's in the sale. Lots of proven show winners in the pedigree of this big fancy lady! Another great TANK opportunity from a Tank!

Sells Open, semen furnished on Jubal or Zegasus. An extremely well-made heifer, sharp clean lines, long-spined, and super feminine. Her productive dam is also the recipient cow of the lot 22 bull so you get to evaluate her as well! King is a maternal sib to the DC/BHD Shazam G3220 ET bull that sired the top sire group at the 2023 DeBruycker bull sale and two top lots at \$60,000 and \$28,000 to Lindskov's LT Ranch.

Sells Open, semen furnished. I think you can definitely see a pattern in these super feminine high-quality heifers bred by Rick & Cindy Evans! They are clean lined, structurally correct, straight topped, big hiped, with the muscle and thickness that makes Charolais the best choice of beef cattle! S3099 has 13 calves, one JDJ Taurus W65, a herdsire for DeBruycker. Her dam, G980, also produced JDJ Ms Cigar K1509, one of the best Cigar's ever, who produced herdsires, JDJ Curlin S3012 and JDJ Royal Trade N134.

PE from 3/25/23 to 4/13/23 to DC/CRJ Rooster H3118 P, M967107. You love the deep bodied broodiness look of these stout heifers. What a beef cow should look like! She traces back to the great WCR Miss Duke 705 that was used in ET program at M6, had numerous progenies for Rockbluff Ranch. As solid a pedigree as you find anywhere! The Rooster mating will elevate her on to an even higher plane of success!

PE from 3/25/23 to 4/13/23 to DC/CRJ Rooster H3118 P, M967107. This top replacement will add tremendous genetics to your herd! On the bottom side, she is out of a full sib to CJC Mr President, the Commander 260 sire, and then the WM Ali Star was a former #1 AICA Multiple Trait Leader for Double O Charolais. Think what you could accomplish with taking all of these top King daughters home to develop a true breeding program!

Selling both IVF and Conventional embryos from Jewel 5124 and various leading sires in the Charolais industry. Descending from a fantastic cow family, her dam 0155, has not only sold at the top of the breed, but her offspring have also topped many sales. Jewel 5124 sold in the WIA sale in 2022 to Hale Farms. She has been a part of the ET program at Jerry Vaughan, with calves in Lindskov LT Ranch, and WIA. She ranks in the top 4% for WW, 1% YW, 25% MTL, 1 % CW, 10% REA, and 1% TSI for breed EPD comparisons. The dollars generated from Jewel and her family would certainly be awesome! All embryos located at KABSU, Manhattan, KS.

60A: Pld heifer calf # 9272, born 8/8/22, bw 78, sired by JMAR Hosea 2M70 (PAF). Bred A-I on 12/29/22 to ACE-ORR Lock n Load. If you wanted to start a herd of Charolais, where would you go....? Jerry and Michelle chose a female out of the Sale of Excellence, RE Ms Duke 745 ET. She wasn't cheap, but they realized to have the best you need to start with the best and \$17,500 later they owned her and her heifer calf. How has it turned out? A full sister to this cow, sold for \$11,000, a bull, sold this last year in the 2022 Southern Connection for \$10,000.00. That's only two of her 40 offspring! Now, 2747 has her own great story, her CI is 9/19; 9/20; 8/21; and 8/22. And a little bonus, she ranks in top 7% for Marb! And describable as a beautiful package! Feminine, perfect udder quality, excellent depth and volume, clean lines, and straight top. Super disposition completes the deal! Don't forget to evaluate this special heifer calf by the \$31,000 Hosea! This cow could be your story book beginning!

Sells bred 1/17/23 to SCX Jehu 233E, the \$245,000 sire! We flushed her one time and got 21 good embryos. A massive female, big boned, tremendous muscling, great disposition, and a brood cow femininity. Out of a tremendous Gold Standard cow, she ranks in the top 6% WW, 4% YW, 30% Milk, 15% MTL, 2% CW, 4% Marb, and 3% TSI for the breed. A proven flush cow in the prime of her life bred to one of the most exciting bulls in breed!

***Sells bred 1/17/23 to DC/CRJ Tank E108 P.** Three of the top bulls for marbling in the breed, One Penny Flash, M6 New Standard, and VPI Free Lunch, doubled up! No wonder 1662 ranks in top 1% for Marb and 10% TSI, along with top 30% WW, and 25% YW for EPD comparisons. A different pattern here with the One Penny Flash addition, a very strong maternal influence and carcass.*

***80A: Pld Bull calf, born 4/6/23 from mating of Pleasant Dawn Chisum 216 (PAF) x M6 Ms New Jewel 0155.** Jewel 0155 has 59 progenies. Another possible herd sire prospect here, and again you can develop him under your environment. Best idea is to buy both, grow them out, keep the one you like best and sell the other one. Probably pay for both lots! Or use both to get a more uniform calf crop and sell bulls to your customers that are half sibs.*

Sells bred A-I on 9/28/22 to DC/CRJ Rooster H3118 P (PAF). Both parents of J800 are PAF. She and her dam had plenty of interest in the Runft Dispersal sale. Her dam went into the ET program for Arlitt Ranch and Evans Ranch. J800 is one of the best phenotypical daughters of Grid Maker in the breed. Plenty of volume, muscling, correctness, superb femininity, to make this a very potential donor in the future!

Sells bred 1/17/23 to DC/CRJ Tank E108 P (PAF). Traces back to the \$50,000 BHD Asset B178 herd bull for Rocking S Ranch and Arlitt Ranch. A good calving ease sire as evidenced by her 5.5 CE and 0.1 BW EPDs. With the Tank calf your insured to have a product you can definitely sell as calving ease and a beifer bull if calf is a bull calf. This was a working pedigree for Runft that produced problem free cattle that kept in him in business since 1956!

- Heifer born Fall 2022 (August, September, and early October)
- Approximately 60-65 Heifers to Choose from
- Sires include: VPI Free Lunch, WCF Silver Gun 467, Fink Gold Standard 0153, LCC 923 of 6868 FL and One Penny Blanco Flash
- Heifers will be weaned approximately the 3rd week of April
- Pick when DNA is completed, approximately June 15, 2023. Selection must be made by 7/1/23

Fink Charolais is recognized as one of the most knowledgeable and successful seedstock producers in the industry! They have developed a program that benefits both commercial and purebred cattle producers to have the ability to make a profit! At their annual sales, bulls and females, are sold all over the U.S. One of the most enjoyable and challenging times you will have is making a selection due to the many fantastic choices and the great hospitality of the Fink's. They will be very happy to assist you in providing records and help in making a selection if you choose. This will be of the utmost in Donor cow material! You can't have breed leading genetics without owning the best in the Breed!

TASK FORCE WORKING TO CAPTURE VALUE FOR COMMERCIAL PRODUCERS OF CHAROLAIS-INFLUENCED CATTLE

BY SHARLA ISHMAEL

There aren't too many scenes that'll make a commercial cattle producer – and their banker – prouder than looking at a stout, growthy, smoky calf standing almost as tall as his black or baldie mama. The picture can change depending on the location of the ranch – he might be looking at the same scale-busting calf next to a good tiger-striped mama down south.

Either way, producers have long known that capitalizing on the magic of heterosis compounded with the use of a terminal-breed sire is a profitable way to max out the scales at weaning, as yearlings or fat cattle. With the nation's Jan. 1 beef cow inventory hitting one of the lowest numbers seen in recent history due to widespread drought, it is more important than ever for the commercial rancher to take advantage of a bullish market predicted for calves and feeders over the next few years.

With a much smaller herd and the need to go slow with restocking as the land recovers from drought – hopefully before the next one hits – every pound will count. Unfortunately, the market is set up today based on premiums for black-hided cattle and given that the cattle cycle has been in the heavy-supply stage, where every segment after the ranch has enjoyed the ability to be choosy, it has meant good cattle of all colors don't always get sold for the value they bring to the industry at every stage.

It's a problem Charolais seedstock producers are not willing to deal with any longer. So much so that the American-International Charolais Association has created a task force of progressive breeders and outside consultants to explore every possible opportunity to make sure their commercial bull buyers get additional or new market access for their calves.

"Numerous closeout sheets from Charolais-influenced cattle harvested at Tyson plants in the past two years document these cattle produce carcasses that compete extremely well on the rail," says AICA Executive Vice President Clint Rusk. "It is imperative this carcass value be reflected in the live market."

Charolais breeders are not alone in their quest to fix the problem.

"Our task force is already working with another task force led by Tom Brink, chief executive officer of the Red Angus Association of America, to explore a change in the way feeder cattle are marketed," Rusk explains. "Our Charolais breeders agree with those who say

feeder cattle should be marketed on their genetic merit rather than the color of their hide."

Last year, Brink released an important white paper with results of a survey of feedlot managers that shows they also see a great need for change in the feeder cattle market. When asked if black-hided feeder cattle are superior to non-black cattle of equal weight, sex and health history, 75% disagreed with that statement.

In fact, 92% of the survey participants agreed or strongly agreed with this statement: "For the beef industry to continue improving its overall cattle quality and value, hide color should be replaced with more objective genetic criteria as a key price-determining factor(s) in the U.S. feeder cattle market."

"Numerous closeout sheets from Charolais-influenced cattle harvested at Tyson plants in the past two years document these cattle produce carcasses that compete extremely well on the rail. It is imperative this carcass value be reflected in the live market."

– Clint Rusk, AICA Executive Vice President Clint Rusk

What will it take to make those changes so smoky or cream-colored calves can get premiums for their performance? For the Charolais task force, all options are on the table, from feeder cattle marketing programs, better utilization of existing grids for Charolais-influenced cattle, data gathering from private sources to solidify how these cattle excel in terms of feed efficiency, average daily gain and overall performance at the feedlot and packer in terms of both red meat yield and quality grade on the rail.

They are working on getting Charolais-influenced cattle into the latest sustainability research projects to study their efficiency advantages relative to other breeds. If carbon capture and greenhouse emissions play a role in the future of beef, breeders on the task force believe the breed's natural efficiency and performance will be a competitive advantage in that arena.

The task force has met with major packing company executives to determine how Charolais-influenced cattle are perceived on their end and what the association can do to help increase demand for the cattle at the retail level. They've also initiated discussions on private branding with meat marketing experts.

Basically, these breeders are reaching out to every segment of the industry to lay groundwork leading to a premium structure for Charolais-influenced cattle at the commercial level. Charolais-influenced cattle are already well-liked in the industry. Ranchers appreciate the cattle for their performance, feeders love them for their efficiency and packers value their cutability, ability to grade Choice or better, as well as putting more product in the box. The task for these seedstock folks is to find ways to capture the real-world value of Charolais-influenced calves.

Marcine Moldenhauer is one of the industry experts AICA has tapped to advise the task force. She has experience both as a breeder of Charolais, Red Angus and Maine-Anjou, 25 years in cattle procurement as a cattle buyer, strategic supply manager and leading the premium sales and marketing team for a major packer. For the last 15 years as owner of Meatlink Management, LLC, her livestock and meat business consulting firm, she has worked with multiple companies in multiple countries, breed associations, chefs and specialty fed cattle beef programs on the challenges and how to approach creating and supplying a branded beef program.

"Packers know the value of Charolais-cross cattle, they do cutting tests, they track performance, they know," she explains. "They know Charolais-cross are going to yield from live to carcass and from carcass to the box; the packers know these cattle have very favorable quality grades with low yield grades. They know these cattle are a good value. However, because over the last 10 years or so there have been plant closings and increased supply, the packers have simply not had to pay more for these types of cattle."

For years, USDA has only recognized "Angus" as 51% black hided, those cattle that are percentage Angus (red or black), have not been accepted into "Angus" brands, such as black-nosed Charolais or the blonde-hided cattle. She believes in order to compete with that, it's necessary to cultivate either a foodservice, retail or a small restaurant partner – better yet one of each – that understands the value and sees an opportunity for them.

"This is why Cargill, for one, created their Sterling Silver brand over 25 years ago," she adds. "The other challenge is to create multi-tiered brands where Charolais-cross cattle that are USDA Select or higher all have a home in a branded beef program. You want multiple programs for the Charolais-influenced cattle to go into. The reality is the packer is not going to find your customer for you, that will be the breed's job."

One of the breeders on the task force is Brett DeBruycker of Montana, who says the Charolais association is up for the challenge.

"We're being very aggressive in fleshing out the different opportunities," he says. "I think the association is refocusing on what is most important to our business, and that is the commercial cattle producer. I'll admit we fell behind promoting what our breed can do.

"For instance, I have documentation that pink-nosed, straightbred Charolais cattle qualified for the following premiums in the summer of 2022. Steers received \$80/head and heifers received \$85/head on the U.S. Premium Beef grid. These cattle added value to the industry by grading and yielding well on the rail," he adds.

"You've got to hand it to Angus, they were out helping packers sell meat, spending money as an association talking to retailers while we, as a breed, were focusing on breed improvement and adding value to our customers and the industry through increased performance, efficiency and carcass quality," DeBruycker adds. "Hindsight being

2020, we should have been helping packers sell Charolais beef. One of the things I have learned on this task force is how vitally important it is for our breed to talk to consumers."

A few years ago, he took a phone call from a gentleman from France who recently moved to Washington state. The man was very excited to have found DeBruycker Charolais online because he had been looking for Charolais beef since moving to the U.S. The man told him in France, Charolais is considered a delicacy and everybody there wants to eat it. DeBruycker says more U.S. consumers would share that fondness for beef from the white breed if they got a chance to taste it and know where it came from.

Mark Nelson is also advising the Charolais task force, and he too has seen the other side of the business having ran the Angus America program for Cargill for seven years. He says part of what the breed needs to keep its eyes on is being ready for the future, when the cattle cycle turns again and cattle numbers are on the rise.

"I think in the next five years, ranchers will benefit from high prices due to short supplies," he says. "But we all know those high prices won't last. So, the breed needs to have something up and running on all cylinders by then so folks with Charolais-cross calves will be able to use them when they really need them. There is so much potential with this breed. Charolais is the kingpin of what they do. The cattle have really been begging for their breeders to do something like this because the cattle merit it."

So, from a commercial perspective what does this mean for their Charolais-influenced calves being born now? It means those white bulls in the pasture will bring home gold for you now by putting extra pounds on the scale when every pound is likely to be worth much more than it has been when cattle numbers were high. And, if the Charolais task force does the job it hopes to accomplish, you'll have not just more pounds to sell in the future but also more premiums and demand for those high-performing calves. Stay tuned. •
